One way or another we are all on a journey. And one way or another we are the hero of that story. So if we are all heroes on a journey what are the obstacles we face? What are the key points in our origin stories? What gives us our power to push through and do the impossible task put before us? What is still waiting to be written of us and what if what has been written in Scripture and modern day movies and television give us a lens to explore it? Join us for a journey is Modern Day Mythology!
